## STATE OF NEW YORK DEPARTMENT OF LABOR

Received Apprenticeship Unit

JUN 1 8 2018

ROCHESTER

APPENDIX A

MACHINIST (CNC)
D.O.T. CODE 600.280-022
O\*NET CODE 51-4041.00

As Revised for RTMA, The Rochester Technology and Manufacturing Association

This training outline is a <u>minimum</u> standard for Work Processes and Related Instruction. Changes in technology and regulations may result in the need for additional on-the-job or classroom training.

#### **WORK PROCESSES**

**Approximate Hours** 

## A. Workplace and Machining Fundamentals

2000

- 1. Health and Safety/Personal Protective Equipment (PPE)
- 2. Lock-Out/Tag-Out
- 3. Handling Hazardous Materials (if applicable)
- 4. Shop practices
- 5. Make machinist calculations
- 6. Read engineering prints and drawings
- 7. Benchwork
- 8. Use saws
- 9. Use drills
- 10. Use grinders
- 11. Use turning machines (e.g., lathes)
- 12. Use milling machines

## B. Principles of CNC Machining

250

- 1. Principles of safety and shop practice
- 2. Basic CNC language and function of the machine
- 3. Nomenclature and controls of the machine

EFFECTIVE APPRENTICE TRAINING

JUN #1 2018-

CENTRAL OFFICE

ATP 32-130A (11/1997)

Apprentice Training Section Page 1 1. Learn all functions of computer which controls axis moves, tool changes, settings, automatic modes, set-up elements, and coolant operation

2. Maintain maximum quality and production of finished pieces

3. Use computer control key board to load all tools in proper location according to set up instructions for part number being run

4. Insure all tools are of good quality and properly loaded as per manufacturing instructions

5. Check work against blue prints

6. Monitor tool wear

7. Understand various alarms and how to cancel them

Received Apprenticeship Unit

JUN 1 8 2018

**ROCHESTER** 

APPRENTICE TRAINING

JUN 1 1 2018

1500

CENTRAL OFFICE

D. <u>Supervised Setup and Operation of Mills/Lathes/Turning Mills/Grinders (minimum of CNC Mills/Lathes required)</u>

1. Make physical and programmable adjustments on drills, reamers, die heads, taps, and insert tools

2. Assemble all tools per tool sheet

3. Load CNC program

4. Assemble/install fixtures per setup documentation

5. Obtain tool offsets (pre-setter/part touch off, etc.)

6. Set Work Coordinate System (WCS) per setup sheet

7. Adjust programmed feeds and speeds

8. Grind and set boring bars, drill and tap holder, burnishing tools, slotting Saws, and mills

9. Perform advanced tool grinding using drill grinding attachments and use optical comparator to check work

10. Check work against blueprints

11. Perform general shop maintenance

E. Independent Setup and Operation of CNC Mills/Lathes/Turning Mills/
Grinders (minimum of CNC Mills/Lathes required)

2000

1. Gather materials, such as set-up sheets, part process sheets, blueprints, programs, attachments, etc.

2. Assemble all tools per tool sheet

3. Assemble/install fixtures per setup documentation

4. Obtain tool offsets (pre-setter/part touch off, etc.)

5. Set WCS per setup sheet

6. Adjust programmed feeds and speeds

7. Perform data changes to job programs, offsets, tool wear, tool geometry, and subroutines

ATP 32-130A (11/1997)

Apprentice Training Section Page 2

- 8. Monitor tool wear, remove, sharpen, and replace tools as required
- 9. Check work against blueprints
- 10. Perform general shop maintenance

## H. Writing Basic Programs

1000

- 1. Understand and execute proper codes (300-400 hrs)
- 2. Introduction to CAM programming

Total hours

8,000

Apprenticeship work processes are applicable only to training curricula for apprentices in approved programs. Apprenticeship work processes have no impact on classification determinations under Article 8 or 9 of the Labor Law. For guidance regarding classification for purposes of Article 8 or 9 of the Labor Law, please refer to <a href="http://www.labor.state.ny.us/workerprotection/publicwork/PDFs/Article8FAQS.pdf">http://www.labor.state.ny.us/workerprotection/publicwork/PDFs/Article8FAQS.pdf</a>.

## APPENDIX B MACHINIST (CNC) RELATED INSTRUCTION

#### Safety

Personal protective equipment

Handling, storing, and disposing of job-related hazardous materials

Trade safety, including all applicable OSHA and EPA regulations, standards and rules

First Aid - minimum 6.5 hours every 3 years

## **Blueprint Reading and Drawing**

Blueprint reading and mechanical drawing

Geometric Dimensioning and Tolerancing

Fundamentals of Computer-Aided Design (CAD) (optional)

### **Mathematics**

Intermediate algebra

Geometry

Trigonometry

Applied statistics (optional)

## Industrial and Labor Relations (20 hours)

History and Background (6 hours, first year)

Sexual Harassment Prevention Training -minimum 3 hours

Current Laws and Practices (14 hours, second year)

Received Apprenticeship Unit

JUN 1 8 2018

ROCHESTER

# Trade Theory and Science

Practical Metallurgy (including plastic, ceramic, other materials)

Introduction to Machine Tools

**Machining Processes** 

Dimensional Metrology (utilization of measuring devices)

Introduction to Computer Numerical Control (CNC)

EFFECTIVE APPRENTICE TRAINING

JUN I I 2018

CENTRAL OFFICE

#### Suggested Additional Topics

**Physics** 

Statistical Process Control

**Drill Point Geometry** 

Machine Design

Fixture Design

Welding

**Heat Treatment** 

**Sheet Metal Working** 

Keyboarding -

**CNC Programming** 

Familiarization with Computer Software (Word Processing, Data Base, Spreadsheet, Graphics)

New York State Education Department

Page 4

Written and Oral Communications Team building Problem solving ISO 9000 qualifying systems

Other Related Courses as Necessary

A Minimum of 144 Hours of Related Instruction are Required for Each Apprentice for Each Year.
